iSPEAK Language Learning Platform

Development Progress Report

Current Status of Platform Development,
Completed Features, and Remaining Work

Report Date: August 6, 2025
Development Status: IN PROGRESS - 35% Complete

EXECUTIVE SUMMARY

The iSPEAK Language Learning Platform is currently under development. The marketing website, e-commerce shop, and blog management systems are operational. However, the core educational features including student portal, teacher admin, lesson booking, and learning management systems are still pending implementation. This report documents completed work and remaining development tasks.

Completed	In Progress	Not Started	Overall
Marketing Site	Core Platform	Student Portal	**35%**
E-Commerce	Testing	Teacher Admin	Complete
Blog System	Documentation	LMS Features	
Language Games		Video Conferencing	

Contents

1 Production Environment

> **Live Website URL**
>
> https://ispeak-app-prod.vercel.app
>
> **Status:** All systems operational
> Website is publicly accessible and functioning correctly

1.1 Infrastructure Overview

Component	Details
Deployment Platform	Vercel (Production Environment)
Database	Supabase PostgreSQL
Storage	Supabase Storage
Framework	Next.js 14.0.4 with App Router
Styling	Tailwind CSS (Responsive Design)
Authentication	Supabase Auth (Ready for Implementation)

2 Platform Features

2.1 Customer-Facing Features

4 African language programs: Yoruba, Kiswahili, Twi, Amharic

Live 1:1 lessons with native speakers

Age-appropriate curriculum for children 3-14 years

Interactive learning platform with progress tracking

Cultural immersion content integrated into lessons

Parent dashboard for monitoring progress

Free trial lessons available for new students

Mobile-responsive design for all devices

2.2 Interactive Language Games

Feature	Status	Details
Languages Supported	3 Active	Yoruba, Kiswahili, Twi
Game Types	4	Number Match, Greeting Game, Color Quest, Animal Safari
Age Range	3-14 years	Age-appropriate content
Access	Free	No signup required
Interactive Features		Click-based learning
Paji Mascot		Animated guide

2.3   E-Commerce System

Feature	Count	Status
Total Products	14	Active
Product Categories	5	Configured
Featured Products	10	Displayed
Product Images	All	Uploaded
Stock Management	Real-time	Functional
Search & Filter	Advanced	Working

2.4   Content Management System

5 published blog posts with full content

3 blog categories for content organization

SEO optimization with meta tags and descriptions

Featured images for all posts

Author profiles with bio and images

Draft/Publish workflow control

Category filtering and search functionality

3 Admin Dashboard Features

Product Management System

Feature	Status	Access Path
Product Dashboard	**ACTIVE**	/admin/dashboard
Product List	**ACTIVE**	/admin/products
Add New Products	**ACTIVE**	/admin/products/new
Edit Products	**ACTIVE**	/admin/products/[id]/edit
Quick Stock Updates	**ACTIVE**	Inline controls
Category Management	**ACTIVE**	5 categories configured
Delete Products	**ACTIVE**	With confirmation
Image Management	**ACTIVE**	Add/Remove/Reorder

Blog Management System

Feature	Status	Access Path
Blog Dashboard	**ACTIVE**	/admin/blog
Create New Posts	**ACTIVE**	/admin/blog/new
Edit Posts	**ACTIVE**	/admin/blog/[id]/edit
Category Management	**ACTIVE**	3 categories active
Publish Control	**ACTIVE**	Draft/Published states
SEO Management	**ACTIVE**	Meta fields control
Author Management	**ACTIVE**	Profile editing
Delete Posts	**ACTIVE**	With confirmation

4 Product Inventory Status

Category	Products	In Stock	Featured
Apparel	3	All	2
Educational Materials	3	All	3
Accessories	3	All	1
Stationery	2	All	1
Toys & Games	3	All	3
TOTAL	**14**	**14**	**10**

5 Technical Infrastructure

5.1 Database Schema

5.1.1 Products Table Structure

- `id` (UUID) - Primary key

- `name`, `sku`, `slug` - Product identifiers

- `price`, `sale_price` - Pricing fields (DECIMAL)

- `stock_quantity`, `low_stock_threshold` - Inventory (INTEGER)

- `featured`, `status`, `in_stock` - Status flags (BOOLEAN/TEXT)

- `images` (JSONB) - Product images array

- `metadata` (JSONB) - Category and additional data

- `project_name` - Multi-tenant separation (TEXT)

5.1.2 Blog Tables Structure

- `blog_posts` - Main content table with 20 fields

- `blog_categories` - Category definitions with colors

- Full SEO fields support (meta_title, meta_description, meta_keywords)

- Author information fields (name, bio, image)

- Publishing status control (is_published, published_at)

- Timestamp tracking (created_at, updated_at)

6 Resolved Issues

Issue	Root Cause	Solution	Status
Stock Display Issue	Field name mismatch (stock_quantity vs inventory_quantity)	Implemented field mapping	
Image Upload	MCP binary limitations	Manual upload to Supabase	
Category Filtering	Missing metadata structure	Added category system	
Vercel Auth Block	Team settings enabled	Removed authentication	
Environment Variables	Missing production keys	Configured via Vercel CLI	

7 Live Website Pages

7.1 Main Pages

- **Homepage:** https://ispeak-app-prod.vercel.app

- **Shop:** https://ispeak-app-prod.vercel.app/shop

- **Blog:** https://ispeak-app-prod.vercel.app/blog

- **Games:** https://ispeak-app-prod.vercel.app/games

- **Contact:** https://ispeak-app-prod.vercel.app/contact

7.2 Language Programs

- **Yoruba:** https://ispeak-app-prod.vercel.app/programs/yoruba

- **Kiswahili:** https://ispeak-app-prod.vercel.app/programs/kiswahili

- **Twi:** https://ispeak-app-prod.vercel.app/programs/twi

- **Amharic:** https://ispeak-app-prod.vercel.app/programs/amharic

7.3 Admin Pages (Protected)

- **Admin Dashboard:** /admin/dashboard

- **Product Management:** /admin/products

- **Blog Management:** /admin/blog

- **Create/Edit Interfaces:** Full CRUD operations

8 Pending Development - Core Educational Features

> **CRITICAL: Core Platform Features Not Yet Implemented**
>
> The following essential features for the language learning platform are still pending development and must be completed before the platform can serve its educational purpose.

8.1 Student Management System

- Student registration and authentication

- Student dashboard with lesson schedule

- Progress tracking and reporting

- Assignment submission system

- Learning materials library access

- Interactive exercises and quizzes

- Certificate generation upon completion

8.2   Teacher Administration System

- Teacher registration and onboarding

- Class management dashboard

- Student roster management

- Lesson planning tools

- Attendance tracking

- Grade and progress reporting

- Availability calendar management

- Payment tracking for teachers

8.3   Parent Portal

- Parent account creation

- Child progress monitoring dashboard

- Lesson booking and scheduling

- Payment management

- Communication with teachers

- Progress reports and notifications

8.4   Learning Management System

- Curriculum structure for 4 languages

- Age-appropriate lesson content (3-14 years)

- Video conferencing integration (Zoom/Google Meet)

- Interactive whiteboard tools

- Homework and assignment system

- Assessment and testing tools

- Resource library management

8.5   Booking and Scheduling System

- Teacher availability management

- Student lesson booking

- Calendar integration

- Automated reminders

- Cancellation and rescheduling

- Trial lesson booking

- Payment processing for lessons

9 Testing Requirements

> **Testing Still Required**
>
> The following testing phases must be completed before production launch:

- **User Acceptance Testing (UAT)** - With actual teachers and parents

- **Performance Testing** - Load testing for concurrent video sessions

- **Security Testing** - Especially for child safety and data protection

- **Payment Integration Testing** - Stripe/PayPal integration

- **Cross-browser Testing** - Ensure compatibility

- **Mobile App Testing** - If mobile apps are developed

- **Accessibility Testing** - WCAG compliance

- **Language Content Review** - By native speakers

10 Future Development Recommendations

Phase 1: Security & Authentication

- Implement admin authentication system

- Add role-based access control (RBAC)

- Set up comprehensive audit trails

- Enable two-factor authentication (2FA)

Phase 2: Enhanced Features

- Customer accounts and profiles

- Shopping cart functionality

- Payment integration (Stripe/PayPal)

- Order management system

Phase 3: Analytics & Monitoring

- Google Analytics integration

- Sales reporting dashboard

- Low stock email notifications

- Performance monitoring (APM)

11 Verification Checklist

Verification Item	Status	Date Verified
Website is publicly accessible	Operational	Aug 6, 2025
All 14 products visible on shop	Confirmed	Aug 6, 2025
Products have correct images	Verified	Aug 6, 2025
Stock quantities display correctly	Fixed	Aug 6, 2025
Category filtering works	Functional	Aug 6, 2025
Blog posts are visible	5 Posts Live	Aug 6, 2025
Admin can edit all content	Full CRUD	Aug 6, 2025
Database connected	Supabase Active	Aug 6, 2025
Environment variables configured	All Set	Aug 6, 2025
Mobile responsive design	Responsive	Aug 6, 2025
